

Bharat BIS Panel for Linoleum Rubber

“Quality Safety Trust – Standards for all”

*QCO Assessment • Training • Practical BIS certification • Standards mapping
• Conformity assessment*

Experts :

Mr. Satish Kumar Gupta - Former Deputy Director General, Bureau of Indian Standards. Over 35 years of leadership in standardization and conformity assessment; led national certification policy, chaired multiple IS committees, and implemented inspection and surveillance reforms that improved product safety and compliance outcomes.

Dr. Rajiv K. Jha - Former Scientist ‘G’ (BIS) and laboratory infrastructure specialist with 36 years’ experience in testing methodologies and NABL liaison. Expert in type-testing protocols, lab accreditation pathways and technical evaluation for electrical, mechanical and light industry products.

Adv. Ravi Shekhar Jha - Senior regulatory counsel focused on BIS, customs and indirect tax matters. Extensive experience representing clients before BIS adjudicatory bodies, drafting technical-legal submissions, and managing remediation, appeals and dispute resolution.

Our single focus : BIS

We do one thing and we do it end-to-end : : Help Importers & manufacturers assess the QCO & its impact, importers and testing houses obtain, maintain and defend BIS conformity (ISI / CRS / FMCS / Registration Schemes). No distractions, no generic compliance noise - just BIS.

Our promise

- Accurate mapping of your product to the correct BIS Standard and Schedule.
- Rapid, error-free application drafting and submission.
- Proactive handling of testing, factory inspection, surveillance and renewals.

Core BIS services (detailed & practical)

1) Standards identification & applicability mapping

- Complete end to end QCO assessment.
- Match each SKU to the correct BIS standard number and clause-level test matrix.
- Identify mandatory vs recommended parameters, referenced international standards, and transitional/withdrawal clauses.
- Create a Standards Compliance Checklist (SCC) for design, BOM and test planning.

2) Certification routes we handle

- **ISI (Indian Standards Mark)** — domestic manufacturer certification workflows, factory inspection readiness and mark usage.
- **CRS (Compulsory Registration Scheme)** — applicant filing, test report validation, and coordination with BIS labs/NABL labs.
- **FMCS (Foreign Manufacturer Certification Scheme)** — representation, technical files, and local authorized Indian representative setup.
- **Registration & Self-Declaration schemes** — where applicable, manage declarations, evidence packs and electronic filings.

- **LR/DPIIT Quality Control Orders (QCO)** — NOC and Exemptions & Clarification application support.

3) End-to-end application & test management

- NOC and Exemptions & Clarification application support with DPIIT LR section for Imports.
- Prepare and submit Form-I / Form-II and supporting documentation to BIS.
- Pre-evaluate test reports for completeness and compliance (format, lab accreditation, witnessed testing).
- Coordinate sample procurement, Type-Testing, and witnessed tests at NABL labs or BIS empanelled labs.
- Manage factory inspection scheduling, pre-inspection corrective-action lists, and demonstration test support.

4) Surveillance, market sample response & dispute resolution

- Prepare timely, technical responses to BIS surveillance notices and market sample failures.
- Root-cause analysis and remedial lab testing plan (including split-sample and re-test strategies).
- Represent clients in technical hearings and help draft mitigation / corrective action packages.

5) License lifecycle — renewals, extensions & changes

- Handle annual license renewals, scope additions (range/variants), and change in manufacturing location or ownership.
- Maintain BIS mark usage records and provide periodic internal audits to avoid misuse penalties.

6) Lab & testing ecosystem advisory

- Recommend NABL-accredited labs and manage lab engagement for complex tests.
- Arrange witnessed testing, third-party QA and pre-compliance bench testing to reduce surveillance risk.

- Advice on in-house lab setup essentials for manufacturers seeking long-term cost savings.

7) Training & capacity building

- Onsite BIS compliance workshops for production, QC and R&D teams.
- Customized manuals: BIS dossier templates, evidence packs and inspector readiness checklists.

8) Standards development & representation

- Assist clients to participate in BIS committees, prepare technical comments on draft Indian Standards, and align product strategy with upcoming standards.

How we work - BIS-specific 5-step flow

1. **Standards discovery** - we map your product to BIS standards and produce the Standards Compliance Checklist.
2. **Gap & test plan** - identify missing tests, recommend labs and draft the evidence pack.
3. **Application & testing** - file the application, manage Type-Testing and schedule factory inspection.
4. **License issuance** - obtain BIS licence, handover the mark usage manual and record-keeping templates.
5. **Maintenance** - surveillance support, renewals, re-tests and committee representation.

(Each engagement includes a clear timeline and milestone sheet specific to the BIS route chosen.)
